MADE IN ITALY

Made in Italy is for us a synonym of style, design and product quality, attention for the environment and for the people. Glem Gas has changed how to conceive the kitchen through a new aesthetic function of the appliances. It is a creative room where design allow to express the own taste and style thanks to the aesthetically refined and simple to use, in position to satisfy any tastes and needs.

 **GLEM**

MADE IN ITALY

OUTSTANDING DESIGN

Glem Gas introduces the new Alpha line, with soft and curved lines and extremely functional in everyday use. A complete range to satisfy any need: dimensions (from 53x50 cm to 90x60 cm), oven size (normal, maxi), cooktop combination (gas burners, electric hotplates, mixed). Some models are also equipped with a LPG bottle compartment or with an additional lateral storage compartment. All cookers are available in stainless steel and in white.

EXCELLENT PERFORMANCES

Not only design and functionality, but also and most of all high level performances. The new ALPHA cookers have specific functions, for both hobs and ovens, that allow to differentiate the type of cooking to satisfy and cooking need.

COOKERS

Alpha

EASY *to* USE FUNCTIONALITY

HIGH-POWER BURNERS

The new triple-ring burners are more powerful and distribute the heat below the pan better, to guarantee unique performances in terms of heating time and cooking uniformity. The classic triple-ring burner generates 3,6 Kw of power.

SINGLE MOULD COOKTOP

Glem Gas models are focused not only on technological innovation, but also on structural details. The new cooktops, made of one single piece, have a continuous surface with no patchiness and are extremely easy to clean. The new minimalist design meets the current trends that prefer basic and clear-cut shapes.

BUILT-IN AND TEMPERATURE REDUCTION

All Glem Gas cookers come with an European Class 2 certification (according to EEC norm UNI EN 30-1-1 class 2), certifying that they are also approved for installation in contact with kitchen cabinets. 33% temperature reduction on operating surface.

TITANIUM ENAMEL EASY TO CLEAN

Thanks to the low porosity of the Titanium enamel, cleaning is so much easier and reduces dirt build up. The Titanium enamel is resistant to the attack of acids and maintains its colour over time even after intensive use. The brightness of the Titanium enamel gives more room and widthness to your oven.

MAXI GRILL

*Thanks to new gas burner, the grilling area increased to 75%.
(Available for 90x60 and 80x50 Maxi oven models.)*

90x60 MAXI-OVEN
